SUMMARY

Frontend engineer with **6.5+ years** building enterprise web applications in **React, Angular and TypeScript**. Most recently at ThoughtSpot, built the UI for **SpotBuild**, an AI platform that generates embedded analytics apps from natural-language prompts. Strong in reusable component design, theming, performance tuning and cross-browser polish, turning UX designs into responsive, production-ready interfaces. Comfortable across the stack with Java, Spring Boot and REST APIs.

SKILLS

Frontend	React · TypeScript · Angular · Redux · JavaScript (ES6+) · HTML5 · CSS3 · SASS · LESS · Bootstrap · Salesforce LWC · Office & Google Workspace add-ins
UI & UX	Design-to-code · Responsive & mobile-first · Component libraries · Theming & branding · Cross-browser · Performance
Backend	Java · Spring Boot · Spring MVC · REST APIs · Microservices · Express.js · MySQL · MongoDB (Mongoose)
Testing	Jest · React Testing Library · Cross-browser testing
Tooling	Git · CI/CD · Docker · Kubernetes (working knowledge)
AI	LLM-powered features · Prompt engineering · Cursor · Claude · GitHub Copilot

EXPERIENCE

ThoughtSpot · Full-Stack Developer (MTS4), Hyderabad
Nov 2024 – Aug 2026

SpotBuild — AI platform that generates ThoughtSpot Embedded apps from natural-language prompts

- Built the **SpotBuild frontend**: UI for prompt-based project generation, Git integration, publishing workflows and **theme and branding customization**.
- Built reusable **React and TypeScript components** with a focus on performance and responsive UX.
- Built **Salesforce Lightning Web Components** that embed ThoughtSpot analytics into Salesforce business workflows.
- Built ThoughtSpot **plugins for Excel and Google Sheets, and PowerPoint and Google Slides**, bringing ThoughtSpot analytics into spreadsheets and presentations.
- Partnered with product managers, designers and backend engineers from requirements through release; used AI tools for coding, refactoring and test generation.

ValueLabs · Frontend Developer, Hyderabad
Nov 2022 – Oct 2024

Snapfish — consumer photo printing & gifting platform

- **Led frontend development** of Snapfish web features in Angular, integrating with backend REST services.
- Integrated Shutterfly APIs to drive dynamic content and DOM updates across the product.
- Diagnosed and fixed **performance and cross-browser issues** and shipped the improvements.
- **Mentored junior developers** and drove code-quality improvements through reviews.

Capgemini · Frontend Developer, Hyderabad
May 2021 – Oct 2022

MySubaru — Subaru's owner platform

- Built **responsive web features** for the MySubaru owner platform, integrating APIs for dynamic data.
- Implemented TomTom maps, jQuery DataTables and CropperJS **from UX designs into production features**.
- Resolved cross-browser defects and built dynamic UI components, working with backend teams on API contracts.

SD MacTec IT Solutions · Full-Stack Developer, Hyderabad
Dec 2019 – Apr 2021

- Built **MacTax**, a tax filing platform, with React, Spring Boot and MySQL, including form validation and API integration.
- Developed **eCrayon**, a learning management system, in Angular and Spring MVC across frontend and backend.
- Built **Consult4at** as a mobile-first React and Spring Boot application.

EDUCATION

B.Tech, Electrical and Electronics Engineering — Vaageswari College of Engineering, Karimnagar 2015 – 2019
